

Business Phone System for Legal Offices

A fully-managed phone system in the cloud. Focus on what's important. Move your business forward.

CONVENIENT

SIMPLE

AFFORDABLE

Legal offices must prioritize effective communication to maintain strong client relationships and streamline operations. A cloud-based phone system is the modern solution for firms looking to enhance flexibility, reduce costs, and ensure reliable connectivity.

In the legal industry, staying connected is crucial for success. A cloud-based phone system tailored for legal offices ensures that every call is handled efficiently, with tools like detailed call logs, voicemail-to-email, and auto attendants to streamline your workflow.

Our Canadian-hosted solution offers unmatched security, scalability, and cost savings, allowing even smaller firms to present a polished, professional presence without the overhead of traditional phone systems. Free your team from hardware constraints, reduce downtime, and focus on delivering the best service to your clients.

Elevate your business with a 100% Canadian cloud communication solution that offers unparalleled flexibility, reliability, and cost-efficiency. Whether you're managing a small firm or a large practice, our comprehensive features—from mobility and automated call tracking to voicemail transcription and call forwarding—empower your team to stay connected, no matter where they are. With seamless scalability, detailed reporting, and no hidden IT costs, you can focus on what matters most: serving your clients and growing your business.

Empower Your Team with Leading-Edge Cloud Communication Tools

Free your attorneys, paralegals, and essential staff from office constraints with our robust, secure, and cost-effective cloud solutions. Even small firms can project the professionalism of a large practice—at a fraction of the cost of traditional landlines. Keep your communications seamless, scalable, and always connected.

Key Features:

Simplified billing with detailed call history – Track client interactions with comprehensive call logs, including time, day, duration, and originating number. Generate scheduled email reports or access real-time insights with ease.

Mobility – Never miss a call with our mobile app for Android and iOS, or utilize our web phone—accessible from any computer with a microphone and internet connection.

Voicemail-to-email & transcription – Stay connected efficiently with voicemail notifications delivered straight to your inbox and convenient voicemail transcription.

Automated call recording – Keep records of all correspondence for future reference.

Call forwarding – Ensure you never miss an important call and eliminate wait times for callers.

Auto attendant – Screen and direct calls automatically to the appropriate extension.

Billable time tracking – Automatically track and log every second of billable time spent on client calls by any member of your team.

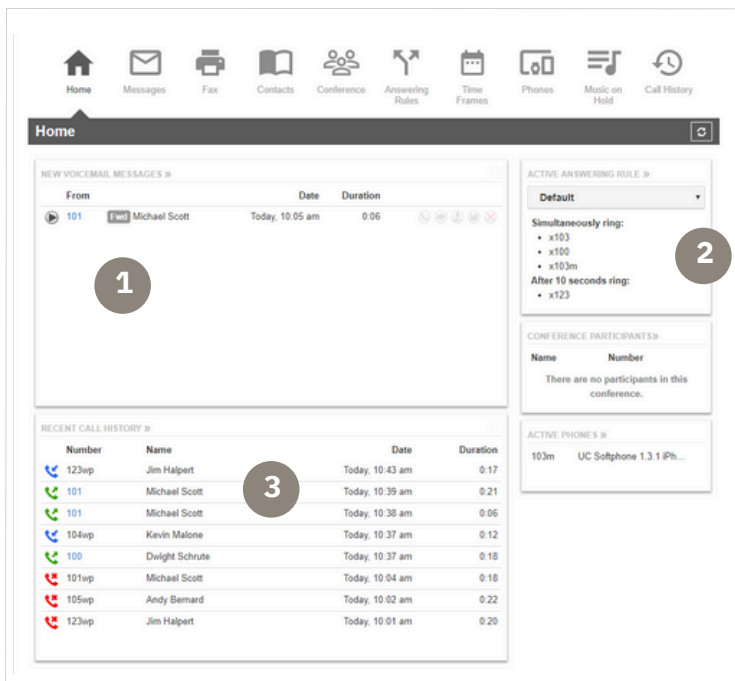

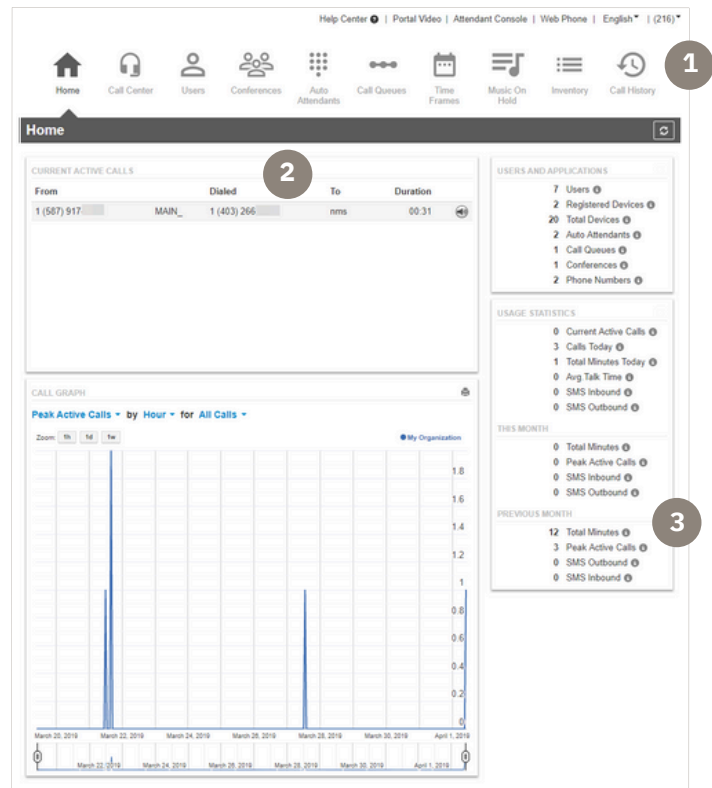

Email fax – Send and receive important faxes on the go.

Scalable and flexible - Easily scale your phone system without the need for new installations or extensions. Our cloud infrastructure allows you to grow your firm from anywhere.

Exceptional Features

Office Manager Web Portal

A dedicated portal that lets you control all functions and features of your phone system.

User Web Portal

An easy to use web portal for each user to review call logs, listen to and manage voicemail and change personal settings.

Call Conference (3 Way Calling)

Add another outgoing call to an already connected call.

Call Forward

Selectable options on forward always, forward on busy, when unanswered or when offline. You can also redirect calls to your mobile phone/external phone number or a user inside your office.

Call Hold

Easily puts a call on hold while you answer another call.

Call Logs

Provides downloadable detailed call records by extension or by company.

Call Screening

Callers are required to record their name, and you get an audible option to accept/decline.

Call Transfer

Transfer calls to another user or outside phone number.

Call Blocking

Block unwanted and/or anonymous callers.

Caller ID and Name Display

Know who is calling before you answer with name and number display.

Caller ID Block

Block your caller ID from being displayed on outbound calls.

Click to Dial

Users can click to dial numbers and return calls in call history from their User Web Portal.

Do Not Disturb

Callers go directly to voicemail when you don't want to be interrupted.

Emergency Assistance (911)

Set an address for individual extensions (users) or for your entire company so that responders know where to send help in the event of an emergency.

Find Me – Follow Me

Calls can be forwarded to multiple numbers that will ring all at the same time or in a sequence you define.

Mobile Apps

Tablet, smartphone and computer apps are available to allow dialing to and from these mobile devices from a WiFi or cellular network.

On Demand Call Recording

Records calls on your extension with simple keystrokes, record what you want, when you want.

Company Call Recording

Automatically record some or all company phone calls and save them securely.

Multiple Devices

You can register multiple devices for each extension. For example you could have your office phone, a softphone on your mobile device and another phone at your home and all could ring at the same time.

Ten-digit Dialing

No need to dial 9 or even 1 to make a long distance call.

Automated Attendant/ Virtual Receptionist

Streamline efficiency with an Automated Attendant to answer and direct all your inbound calls. You can optionally configure to have live answer before the Automated Attendant kicks in. Incoming callers select options from a menu to reach the appropriate department or individual.

- Different greetings for day or night
- Holiday schedule and greetings
- Dial by name directory
- Transfer to external numbers automatically

Music and Messages on Hold

Upload your customized recordings. We can also record your message for you.

Simultaneous Ring

Same as Find Me - Follow Me, allows you to program many numbers where you can be called in a cascading or simultaneous order.

Time Frames

Easy drag and drop scheduler to set your office hours and call routing.

Voicemail

Every user gets their own voicemail to securely check messages from the phone, or a website from anywhere in the world.

Voicemail to Email

Receive voicemail as an audio file attached to email. Can be played back on your smart hone. Also see optional Voicemail Transcription.

Hunt Groups

Calls can be forwarded to multiple users or telephone numbers that will ring all at the same time or in a sequence you define. For example, the sales or service team can be in a hunt group.

Web Phone

Use an extension on the go using chrome with any computer and microphone. Compact and expanded views give users the choice to see active chats, answering rules, voicemail messages, and more.

Mobile Softphone

Compatible with both Android and iOS the Mobile Softphone allows any user to use their cell phone like a desk phone. Dial contacts in your local phone book or company directory, record and change greetings, send and receive chat messages, and view your voicemail and transcription right from the app.

Add-on Features

Voicemail Transcription

Have your voicemail messages emailed to you as written transcripts, with audio files attached.

Greeting Changes

Changes to your greetings are available. Fees apply to each order which could include single or multiple recording changes done at the same time. You can upload and record your own greetings at no charge anytime.

Conference Calling

Full web control and recording for inbound calling. Also add outbound called participants from the portal.

Toll Free Number

Add a new toll free number or let us move your existing toll free number. Toll Free numbers allow anyone in Canada and the US to reach you without the caller incurring any long distance charges.

Local Numbers

Keep your existing number(s) or pick from over 1,600 Canadian cities or towns. Portray a local presence in any additional market by publishing a local phone number in any area code. International and US cities are also available.

- Local numbers for remote employees
- Great for geo-targeted marketing campaigns
- Same functionality as Main Company Phone Number

Internet Fax

Easily send faxes via the web or email. Receive faxes via the Web or in your email as an easy-to-file-or- forward PDF document.

Portal Fax

Use your phone portal account to send and receive personal faxes in PDF format. Faxes will be forwarded to your email for attention.
